

## Cap Blasting Electric, KM6

Electric Blasting Cap KM6 is used to initiate high explosives with a blasting machine or other suitable source of electric power. It is capable of detonating all standard military explosives.

<b>Covering material</b>	Aluminum alloy
<b>Dimensions</b>	Ø6.09 × 59.69mm
<b>Dimensions of wire</b>	3.6m
<b>Filler</b>	RDX / Lead Azide / Special Mix (Barium Chromate + L/S)
<b>Method of actuation</b>	Electric current
<b>Packing</b>	500ea in a wooden box
<b>Packing Box</b>	30kg
<b>U.N. Number</b>	0030
<b>IMDG code</b>	1.1B

## Cap Blasting Non-Electric, KM7

Non-electric Blasting Cap KM7 is used to detonate all military explosives.

<b>Covering material</b>	Aluminum alloy
<b>Dimensions</b>	Ø6.09 × 59.69mm
<b>Filler</b>	RDX / Lead Azide / Lead styphnate
<b>Method of actuation</b>	Flame or impact
<b>Packing</b>	1,200ea in a wooden box
<b>Packing Box</b>	35kg
<b>U.N. Number</b>	0029
<b>IMDG code</b>	1.1B
